DETAILED ACTION***Terminal Disclaimer***

The terminal disclaimer filed on 3/15/2002 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Pat. 6,217,914 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-26 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 32-51 of U.S. Pat. App. 09/732,385 and 1-20 of U.S. Pat. App. 09/997,663. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claim similar compositions and/or methods for treating skin containing pretreated ascorbic acid. Further, although 09/997,663 was filed several days after the present application, claims 1-20 of US Pat. App. 09/997,663 would have been obvious over claims 1-26 of the present Application as they both claim similar compositions and the composition claims of the present application contain anti-inflammatory compounds, such as glucosamine, such that one of ordinary skill in the art

Art Unit: 1616

would expect that the compositions would be suitable for treatment of anti-inflammatory skin conditions.

Examiner is uncertain why Applicant's terminal disclaimer did not address 09/732,385.

The terminal disclaimer solely as to US Pat. 6,217,914 does not overcome the provisional rejection over a separate application. See also MPEP 804.02, Section VI.
